CONABIO

Reúne, genera, integra y sintetiza información sobre la biodiversidad mexicana.

Se apoya en los investigadores de todo el país para reunir la información actual y confiable de diversos temas y regiones.

Para que la sociedad conozca, aprecie y conserve la riqueza natural de México y que los tomadores de decisiones generen políticas públicas basadas en conocimiento confiable para mejorar la calidad de vida de toda la sociedad.

CONABIO

The Agrobiodiversity Information System

- [Mexican Agrobiodiversity GEF project](#)
- Information system for agrobiodiversity ([SI AgroBD](#)):
 - Generate and systematize open data.
 - Native crops in traditional agriculture.
 - Inform food security and conservation policies.

Funding source

Implementing agency

Executing agency

Nutrition, uses and traditions

Seed bank data

Local commerce and production

Field data collection

How do we demonstrate public value?

- Our community
 - Funders
 - Students & researchers
 - Government
 - Civil society organizations
 - Research institutions
 - Other areas at CONABIO

Diverse roles, interests
and expectations

Inspiration

- But different:
 - Scale.
 - Development stage.
 - Context.

Demonstrating public value to funders and other stakeholders—the journey of ELIXIR, a virtual and distributed research infrastructure for life science data

Abstract

Open Science is a founding principle of ELIXIR, a pan-European research infrastructure for life science data, with 21 Member countries plus the European Molec-

Define a narrative

Data

Tools

Collaboration

- Most visible.
- Easy to measure.

- Development and maintenance are less visible.

- Least visible.
- Difficult to measure.

Define a narrative

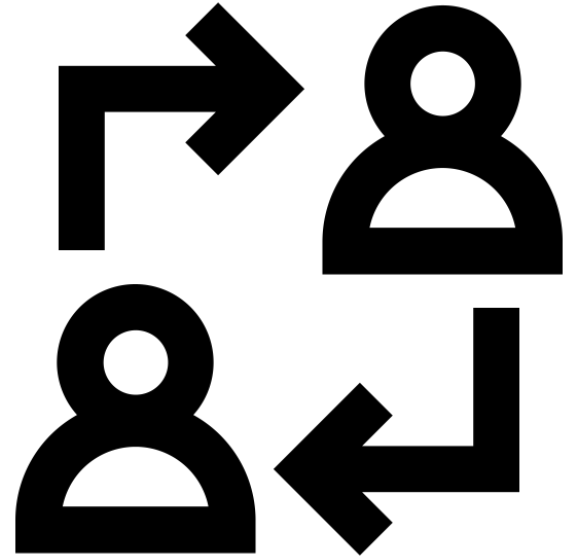

Advocacy through training

- Workshop on data literacy skills.
- Topics:
 - Open and FAIR data
 - Biodiversity data infrastructures
 - Data lifecycle
 - Ethical data use
- Result: increased awareness of open data as a collaborative effort.

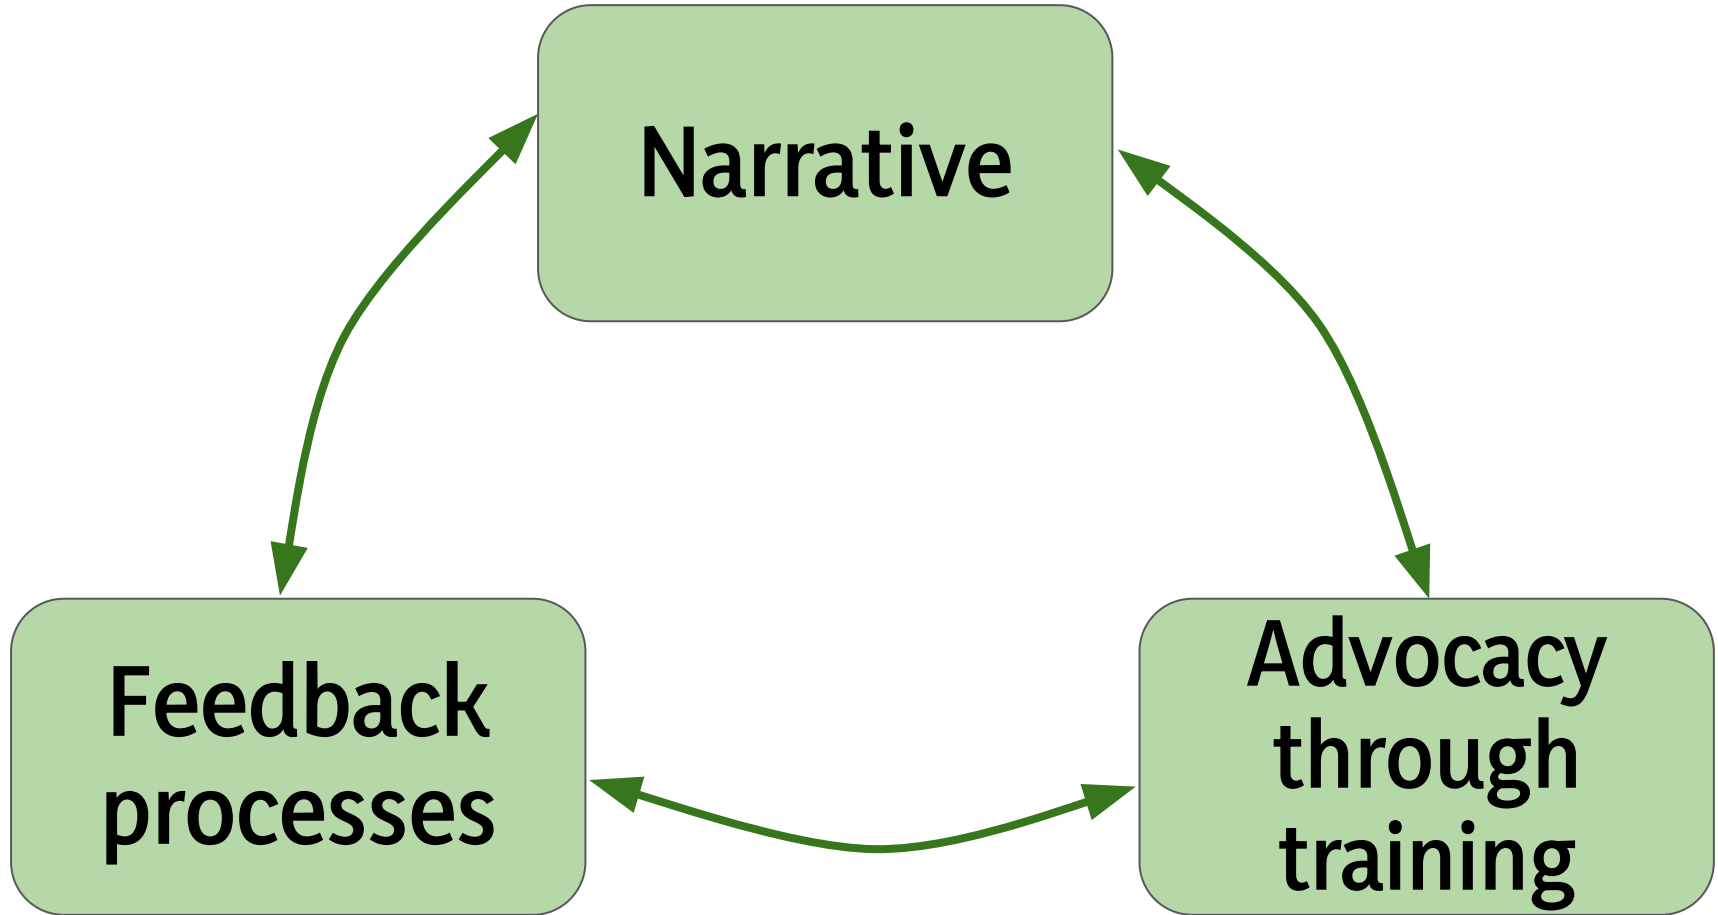

Establish feedback processes

- With users:
 - Surveys.
 - Focus groups.
 - Knowledge exchange between community members.
- With funders and evaluators:
 - Use & adoption perceived more important than data & publications.

Ask & listen

What can we do at a
broader scale?

Thank you
